SOVIET JOURNAL OF COMPUTER AND SYSTEMS SCIENCES

(formerly Engineering Cybernetics)

CONTENTS FOR 1989

Number 1

	English Page	Russian Page
V.B. Larin: Control of a Walking Apparatus	1	93
A.A. Yeres'ko: Modeling the Kinematics of a Reinforcing Manipulator	9	102
V.A. Korneyev: The Game Problem of the Distribution of Roles with a Small Parameter	16	167
Yu.M. Astapov, M.Yu. Molokanova, and M.Yu. Seregin: Identification of a Mathematical Model for the Angular Oscillations of a Rigid Body Moving in a Viscous Medium	23	176
A.I. Ovseyevich and Yu.N. Reshetnyak: Approximation of the Intersection of Ellipsoids in Problems of Guaranteed Estimation	28	182
S.O. Kuznetsov and V.K. Finn: Extension of Expert Systems Procedures of the DSM Type to Graphs	34	4
L.B. Nisenboym: Modelling of Deductions Based on the Algebraic Apparatus of Intensional Relations	40	12
S.G. Vorob'yev: Use of Conditional Term Rewriting Systems in Automatic Theorem Proving. I	49	25
Ye.F. Mitenkova; Production System for Description of Standard Behavior of Members of a Small Group	60	40
Ye.M. Gudyreva and M.Sh. Tsalenko: An Algebra of Hierarchical Data Structures	67	51
T.A. Gavrilova, K.R. Chervinskaya, and A.M. Yashin: Formation of a Knowledge Field Using the Example of Psychodiagnosis	83	72
I.A. Khodashinskiy: The Pseudophysical Logic of Magnitude Estimates	93	96
M.I. Koov, M.B. Matskin, and E.Kh. Tyugu: Integration of Conceptual and Expert Knowledge in CAD Systems	103	108
A.F. Blishun: Comparative Analysis of Methods of Measuring Fuzziness	110	152
A.N. Borisov and N.N. Slyadz': Fuzzy Domination of Decisions under Conditions of Incomplete Information	127	176
V.Ye. Zhukovin, S.P. Makeyev, and I.F. Shakhnov: Potential Fuzzy Relations and Their Use in Object Ordering Problems	132	182
BRIEF COMMUNICATIONS		
Yu.V. Bolotin: Duality in the Problem of Optimal Stabilization of Coupled Mechanical Systems	138	190
S.I. Bigil'deyev and Yu.F. Golubev: Effect of the Inertia of Drives and Leg Links on the Energy-Optimal Motion of the Body of a Walking Robot	142	194
A.B. Kuz'min: Efficiency of Identification of Parameters in Adaptive Estimation	146	198
I.A. Ushakov and E.A. Aliguliyev: Optimization of Data-Transmission Network Parameters Using the Method of Statistical Modelling	151	203
A.A. Dzhamirzayev: Construction of Admissible Variants for Distribution of Channels and Memory in a Message-Switching Network	154	205
V.A. Babitskiy and G.A. Medvedev: Correlation Between the Flow of Output Requests and Its Influence on Waiting Time in Series Queueing Systems	158	210
V.V. Malyshev and D.E. Chernov: Dynamic Control Problems with Probabilistic Criteria	162	213
L.S. Bershteyn and V.B. Melekhin: Structure of a Procedural Representation of the Knowledge of an Integral Robot. II. Frame of the Behavior Microprogram	167	190

Number 2

V.E. Berbyuk and G.F. Ivakh: Mathematical Design of Gantry Robots for Automating Assemby Processes	1	74
M.Ye. Arkhipov, A.B. Maslyukov, I.V. Medvedev, and V.V. Reshetnikov: Principles for Constructing a Distributed Control System for Flexible Industrial Manufacture	9	140

	English Page	Russian Page
S.V. Yemel'yanov, V.B. Gavrilov, and A.A. Solov'yev: A Differentiation Algorithm with Automatic Adjustment to Frequency of the Input Signal	13	146
V.N. Vagin and M.Yu. Vasil'yev: An Abstract Scheme for a Parallel Logical Inference Machine	18	195
N.N. Bragin, V.I. Varshavskiy, and R.A. Lashevskiy: The Nature of Faults in Integrated Circuits	26	207
N.S. Grigor'yeva, I.Sh. Latypov, and I.V. Romanovskiy: Cyclic Problems of Scheduling Theory	34	3
L.M. Kitaynik: Fuzzy Binary Relations and Decision Making Procedures	40	12
B.B. Kolotilin, I.S. Litvinchev, and V.I. Tsurkov: The Problem of Optimal Deployment of Information-and-Computer Equipment in a Three-Level Real-Time Network	53	31
A.S. Nemirovskiy and S.V. Shil'man: A Recursion Method for Statistical Estimation of Eigenvalues and Eigenvectors of Matrices	60	39
L.I. Feygin: Distribution of Resources under Fuzzy Constraints	65	45
A.B. Ladenzon and B.G. Litvak: The Principle of Ordered Criteria in Multicriterial Estimates	69	49
M.I. Revyakov: Optimal in Reliability Allocation of Standby Systems Consisting of Elements of Different Reliability	74	72
V.F. Samoseyko: Estimation of the Probability Characteristics of System Elements Based on Censored Observations	78	77
Ye.I. Ostrovskiy, A.I. Pereguda, and M.L. Fokina: Optimization of Periodic Testing of Complex Systems	84	84
G.B. Rubal'skiy: Deterministic Model of Inventory Control with Periodic Fluctuations in Prices and Demand	88	89
Yu.Ye. Malashenko: Guaranteed Estimates on the Viability of Nets	94	97
V. Kale and Yu. Tidge: Simultaneous Confidence Estimation of Parameters of the Weibull-Gnedenko Distribution from Observations of Renewal Processes	98	103
M.A. Babushkin and M.Sh. Tsalenko: Relational Algebras with Truth Estimates	103	125
P.D. Krut'ko: Control Algorithms for Elastic Electromechanical Systems	109	177
A.A. Krasovskiy: A Method of Fast Numerical Integration for One Class of Dynamical Systems	117	3
S.K. Korovin, I.G. Mamedov, and A.P. Mamedova: Uniform Stability with Respect to a Small Parameter and Stabilization of Discrete Singularly-Perturbed Dynamical Systems	127	21
I.M. Anal'yevskiy and V.B. Kolmanovskiy: Control of Certain Mechanical Systems When There is Incomplete Information	135	30
A.F. Tarakanov: The Maximum Principle for Certain Minimax Control Problems for Connected Sets	142	54
M.I. Markechko and M.V. Rybashov: On the Dissipativity of Continuously-Discrete Systems	146	33
BRIEF COMMUNICATIONS		
V.V. Araksyan: Analytical Methods for Calculating the Reliability of a Package of Interactive Programs in Automated Control Systems	151	224
G.I. Orlova: Three Methods for Solving the Problem of Maximal Cut of a Non-Planar Graph	155	186
S.A. Grishin: On the Question of Realizability of a Control Law in a Stabilization Problem	158	194

Number 3

A.I. Gol'berg (dec.) and V.A. Gurvich: A Problem in the Theory of Extremal Graphs and Its Application	1	106
Ye.V. Levner and A.S. Ptuskin: The Construction of Cyclic Schedules for Fuzzy Durations of Operations	10	117
I.A. Ushakov and E.A. Aliguliyev: Use of the Method of Statistical Modelling for Optimizing the Number of Channels in a Communication Network	15	122
N.S. Ayupov and R.S. Ayupov: Calculation of the Variance in a Parametric Model with Inexact Parameters	18	126
Ye.V. Morozov: A Stationarity Criterion for a Certain Class of Non-Poisson Servicing Networks	21	129
G.I. Falin: On a Single Server System with Randomly Varing Service Rate	26	134
T.K. Vinogradova and N.A. Lizunova: Parametric Synthesis in a Minimax Control Problem	29	138
S.I. Ibragimov: A Control System for the Flow of Gas in a Pipeline	36	145
V.A. Leonov, V.N. Ovcharenko, B.K. Poplavskiy, and G.N. Sirotkin: The Effect of Input Signals on the Identifiability of the Parameters of Linear Dynamic Systems	41	152
E.M. Khazen: Recursive Classification and Estimation Algorithms in a Regional Automated Air Traffic Control System	46	159

	English Page	Russian Page
G.S. Osipov: A Method for Forming and Structuring Knowledge Models for One Type of Object Space	52	3
L.B. Nisenboym: The Use of Intensional and Semantic Relationships in the Description of Knowledge	60	13
Yu.I. Kislenko and V.I. Kostyuk: Information Support for an Autonomous Robot	67	49
A.V. Suvorov: Structural-Dynamic Modeling in Automated Systems	76	60
N.N. Nepeyvoda: Constructive Logic Tools. II. Intuitional Logic and Constructive Logics of Program Schemes	81	65
M.I. Kanovich: Logical Foundations of the Synthesis of Program Schemes for Solving Computational Problems	94	82
I.P. Kossey: On Possibilities of Application of the Second-Order Resolution Method in Intelligent Computational Systems	105	94
N.V. Dunskaya and Ye.S. Pyatnitskiy: The Objective Potential Method in Problems of Synthesizing Controls for Manipulator Robots	115	14
V.I. Babitskiy and A.S. Kovaleva: Optimal Control of a Resonant Stepping System	124	26
A.V. Abarinov, B.V. Aksel'rod, N.N. Bolotnik, V.B. Veshnikov, A.V. Gomozov, V.G. Gradetskiy, F.V. Zinov'ev, L.M. Meshman, V.S. Moskalev, M.Yu. Rachkov, and F.L. Chernoushko: A Robot System for Moving Over Vertical Surfaces	130	58
V.L. Afonin, A.A. Pozharinskiy, and P.I. Chinayev: Synthesizing a Control for an Elastic Manipulator System in Surface Machining	143	84
N.V. Gorbachev, A.Ye. Filimonov, A.N. Shpakov, and A.G. Shukhov: Algorithms for the Control of Transport Robots in Flexible Manufacturing Systems	150	131
BRIEF COMMUNICATIONS		
O.A. Dyshin: Solution of a Problem of Selecting an Optimal Series with Restrictions on the Volume of Production	159	166
N.F. Afanas'yev and V.A. Blinov: A Method of Constructing Recursive Algorithms of Filtering Random Fields	161	168
G.N. Povarov: On a Comparison of Boolean Functions with Constants	167	174
M.V. Glebov and S.S. Veniaminov: On Extension of the Domain of Applicability of the Dominance Principle	170	176
I.V. Isichenko and V.P. Perov: Iterative Methods for Solving a Class of Problems of Optimal Control of Systems with Distributed Parameters	173	179

Number 4

A.N. Sirotin and K.V. Sochnov: Discrete Control of Motion of a Non-Rigid Body for Constraints on the Control and the State Vector	1	152
A.P. Krishchenko and A.N. Nazarenko: Sets of Controllability for Second-Order Nonlinear Systems	7	159
V.Yu. Anisimov and E.V. Borisov: Optimal Resource Allocation with Fuzzy Initial Information	13	55
R.A. Aliyev and A.E. Tserkovnyy: An "Intelligent" Production Control System for an Oil-Processing Plant	20	109
L.S. Bershteyn and V.B. Melekhin: Structure of a Procedural Representation of the Knowledge of an Integral Robot. I. Diffuse Semantic Networks	28	119
A.V. Kolnogorov: A Minimax Approach to Optimal Expedient Behavior in Stationary Environments over Finite Time	33	143
A.Yu. Leviatov: Calculus of Estimates	36	147
Yu.R. Kotta: Decomposition of Nonlinear Discrete Controlled Systems	58	15
N.A. Bogatyreva and Ye.S. Pyatnitskiy: Optimal Control of Mechanical Systems in Potential Fields	63	37
A.N. Voronin: Approximate Solution of Multicriterial Variational Control Problems	71	46
I.Ye. Kazakov: Stochastic Systems with Random Change of Structure (A Survey)	78	58
I.K. Volkov: On a Problem of Parameteric Indentification of Continuous Models of Controlled Systems	94	101
B.O. Kachanov: Estimation and Identification by the Method of Maximum Mean A-posteriori Probability on a Sliding Observation Interval	98	105
Yu.M. Gusev, R.U. Daminov, V.Yu. Rutkovskiy, and V.A. Semeran: Identification and Synthesis of Digital Control Systems Based on a Spectral Representation of Time Characteristics in a Walsh Functions Basis	104	112
V.V. Dombrovskiy: Synthesis of a Reduced-Order Discrete Extrapolator	111	120
G.G. Sebryakov and A.V. Semenov: Design of Linear Stationary Multidimensional Systems Based on Input-Output Mapping. Methods of H^{∞}-Theory Control (A Survey)	115	3

	English Page	Russian Page
Yu.Ye. Malashenko, V.S. Rogozhin, and Ye.V. Ferapontov: Deterministic Models for Estimating Viability and Vulnerability of Networks	125	17
V.I. Karlov, M.N. Krasil'shchikov, and V.V. Malyshev: Controlling Observational Process Under Conditions of Statistical Uncertainty (Survey, Part II)	136	39
BRIEF COMMUNICATIONS		
Yu.M. Makarov: Formulas with Guaranteed Accuracy for the Reliability of Systems with Time Redundancy	148	188
V.V. Maslennikov: A Method for Approximate Estimation of Oscillatory Stability of Linear Systems	152	192
S.G. Vleduts and Ye.V. Levner: Duality Relationships in Multicriterial Problems of Mathematical Programming	155	197

Number 5

A.I. Barvinok and A.M. Vershik: Methods of Representations Theory in Combinatorial Optimization Problems	1	64
V.I. Karlov, N.M. Krasil'shchikov, and V.V. Malyshev: Control of the Observation Process in Stochastic Systems (Survey. Part 1)	8	79
B.G. Mel'nikov and A.A. Musayev: Optimal Finite-Memory Filtering	22	95
A.F. Vereshchagin: Modelling and Control of Motion of Manipulational Robots	29	125
N.N. Rogov and F.L. Chernous'ko: Optimal Control of the Electric Motor of a Robot with an Elastic Element	39	135
D.B. Izosimov and S.V. Skoropad: Digital Control of the Electric Drive of a Robot Using Sliding Modes	51	146
A.V. Timofeyev: Adaptive Control of Robots	59	154
O.A. Mishulina: Multichannel Discrete Filtering of Functionally Connected Processes	71	56
S.M. Yermakov and V.B. Melas: Optimal Branching of Trajectories in Simulation of Systems Described by Stationary Random Processes	79	64
A.V. Fomenko: Synthesis of an Optimal Control Using a Parametric Field and Taylor Mappings	85	75
O.I. Gerasimov, K.V. Shiff, and I.B. Yunger: A Method of Numerical Analysis of the Stability of Automatic Systems with Scalar Nonlinearities	90	80
S.K. Volovodov, A.A. Potapov, and Ye.N. Rozenvasser: Numerical-Analytical Investigation of Periodic Regimes in Multiply-Connected Nonlinear Pulse Systems	97	87
L.M. Skvortsov: Input-Output Representation of a Closed Multidimensional Control System	105	95
A.G. Degtyarev: A Locally-Optimal Algorithm for Automatic Control of the Motion of Linear Systems	110	100
A.A. Pervozvanskiy and I.Ye. Sheynis: Control of the Delivery of Articles for Assembly on Conveyor	116	106
A.A. Melikyan: Minimax Control Problem in the Case of Incomplete Information About Target Point Position	121	111
V.P. Kuz'min and V.A. Yaroshevskiy: Approximate Method for Estimating the Probability of Large Deviations of Aircraft Trajectory Parameters Under Random Perturbations	128	119
O.G. Gorbachev, S.A. Guz, and A.A. Natan: Procedures for Decision Making Based on Finite Training Samples Utilizing Hierarchical Representation of Multidimensional Objects	136	139
S.P. Makeyev: Structure of Transitive Fuzzy Relations	142	146
BRIEF COMMUNICATIONS		
M.Yu. Akhlebininskiy and M.S. Konstantinov: Choice of Strategy for Servicing of Objects in a Certain Parametric Problem of M Travelling Salesmen	147	169
A.Ya. Tetel'baum: Rectilinear Folding of a Graph with Quasiminimal Number of Intersections of Edges	153	173
V.N. Vinogradov and G.A. Golubev: Approximate Solution of the Problem of Nonlinear Recurrent Filtering of Processes with Discrete Time According to a Broadened Filterable and Observable Process	156	182
Ye.A. Andreyeva: Necessary and Sufficient Conditions for Optimality in the Case of Discrete Controlled Processes	161	186
A.G. Perevozchikov: Design of a Dynamical System as a Problem of Controlling a System with Distributed Parameters	167	191

Number 6

	English Page	Russian Page
A.I. Migunov: The Use of Intensional Logic Models in the Description and Supplementation of Knowledge	1	86
R.A. Aliyev, D.Ye. Gul'ko, and M.M. Shakhnazarov: An Expert System for Industrial Planning	10	118
Ye.I. Yefimov: Logic of Conversational Reasoning	20	129
S.K. Dulin and S.R. Rodin: A Network Menu System as a Tool	37	146
A.V. Andreychikov, A.M. Dvoryankin, and A.I. Polovinkin: Using Expert Systems in an Automated Bank of Engineering Knowledge for Development and Design by Search	41	183
A.A. Krasovskiy: Approximation of Functions of Many Arguments in Systems of Digital Modelling	47	3
Yu.A. Kochetkov: Optimal Control of Deterministic Nonlinear Automatic Systems. The Method of Invariant Embedding	55	3
A.F. Tarakanov: The Maximum Principle for Certain Minimax Control Problems on Connected Sets	63	10
A.I. Zholudev, A.I. Tyatyushkin, and N.M. Erinchek: Numerical Optimization Methods for Controlled Processes	67	14
N.Ye. Zubov: Relay Control Based on Pontryagin's Maximum Principle and on a Forecasting-Model Control Algorithm	84	32
L.Ye. Zabello, A.L. Lebedev, and A.F. Opeyko: Synthesis of Optimal Controllers in Linear Systems with Time Lags Under Incomplete Information	92	40
B.V. Sazykin: Models of Optimal Strategies in Sequential Decision Making	99	46
V.I.Kukhtenko, Ye.V. Orlov, and V.I. Timoshchenko: A Unified Approach to Control of Linear Stochastic Systems with Random Parameters. Part II	106	54
V.N. Yevdokimenkov, V.I. Karlov, and M.N. Krasil'shchikov: Estimation of Probability Quality Criteria Values Close to Unity Based on Experimental Planning Methods	118	92
B.I. Anan'yev: Minimax Regulators for Statistical Indeterminate Controlled Systems	130	105
A.A. Lobatyy: Probabilistic Analysis of Control Breakdown in an Inertial Automatic System	142	116
R.V. Kyuts, Yu.A. Mikomyagi, and R.G. Randma: An Algorithm for Sequential Estimation of Parameters of a Nonstationary Regression Model with Errors in the Variables	146	120
V.F. Biryukov, Ye.M. Voronov, and A.P. Karpenko: Guaranteed Estimate of the Efficiency of a Multidimensional Linear Filter with One Section and Prototype Filter Specified	157	130
BRIEF COMMUNICATIONS		
A.G. Tatashev: Optimal Strategy for Replacement of System Elements with an Unloaded Standby	164	195
Ya.G. Genis: Two-Sided Estimates for the Reliability of a Renewable System under a Nonstationary Operational Regime	168	198
